

Installation Guide(20W-70W)

This procedure is designed as an installation aid. Skilled tradespeople that are familiar with general construction and electrical installation techniques should perform the installation. Licensed electricians should provide electrical installation connections. Installations and connections should be done in accordance with all national and local codes and permits. In no way is this document intended to construe warranty or fitness of use of the products described, nor is it intended to provide safety instruction for those installing the product.

Multiple ways of installation

1. Loosen the four screws on the bracket, but do not unscrew them all, as shown below.

2. Connect the lamp with wire from pole (correspond L, N, GND lines), then according to the arrow direction of the lamp bracket inserted into the lamp pole (can be used on 40-63mm light poles), as shown below.

3. Tighten the four screws of the bracket as shown below.

4. The installation is completed as shown below.

WARNING

Before proceeding with installation or service maintenance of this product:

- Disconnect power to reduce electrical shock risk.
- Review the entire Installation Guide.
- Inspect this properly packaged product for any damage that may have occurred during transit.
- Verify product application complies with manufacturer design recommendations.
- Verify the availability of necessary tools and incidental material.
- Verify applicable code requirements. Field assembly and installation are subject to acceptance by local inspection authority.
- Appropriate safety equipment to be determined by end user, per applicable safety standards and precautions.
