PLA Series LED Area Light

Shoebox / Parking lot lighting Power: 75W - 230W

Features of **PLA** Series

For others & details please request

The **benefits** of opting PLA series

Professional Distribution Options

Customized for parking lots, ensuring flawless uniformity with a BUG rating of 0.

Ample Inner Space

Reserved sensor installation position, ample inner space, reserved location for convenient installation.

Slick Back Design

Slick back design to reduce dust accumulation.

Seven Optional Installation Brackets

Providing flexibility and convenience to meet various installation requirements.

Exceptional Impact Resistance

IK09, passed 3G shock resistance test.

PLA series is an economical energy-saving and flexible application scenarios area light with high-cost performance. It is designed for commercial and industrial applications, providing cooler operating temperatures, brighter light and longer LED span.

- Light engine is thermally isolated from driver components for better heat dissipation, industrial-level design standard.
- Micro-lens systems produce IESNA Type III, Type IV and Type V distributions, full cutoff type, no uplight pollution.
- \cdot Luminaries produces 0% total lumens above 90 $^\circ$ (BUG Rating, U=0), provides uniform light output with a lower glare.
- · Optical systems maintain an IP66 rating.
- The top spot of the fixture is reserved for the sensor in the case of future installation.

Note: Normal Voltage=100-277VAC, High Voltage=277-480VAC, please evaluate before choosing. For the power supply in the United States and Canada, in case the input voltage fluctuation ≥240V the High Voltage solution is highly recommended for performance stability. Improper selection will cause damage to the driver or the light.

Photometric **Design**

- Optimized, premium optical grade Mitsubishi polycarbonate lens, the efficient design of the modules make each light engine highly customizable, allowing the light distribution to be aimed toward the application.
- · Optical systems allow for versatility, tight cutoffs, and flexible control for a wide variety of applications.
- · We deliver innovation and customization, further expanding the flexibility of the project. Exceptional uniformity and low glare for maximum comfort and neighbor-friendly.

- The photometric engine takes advantage of the latest generation of mid/high-power LEDs and dedicated optics for professional applications.
- With 3030 or 5050 LED chips, it provides an alternative solution for those who are looking for very cost-effective yet efficient lighting while keeping the same luminaire design.

Flexible Installation

• Up to 7 installation methods (brackets) can be suitable for different installation scenarios, quickly adapt to the needs of the project. Convenient and **Flexible.**

Custom Dimming Profile

Intelligent luminaire drivers can be programmed with complex dimming profiles. With customized combinations of time intervals and light levels are possible. This feature does not require any extra wiring.

The period between switching on and switching off is used to activate the preset dimming profile. The customised dimming system generates maximum energy savings while respecting the required lighting levels and uniformity throughout the night.

Daylight Sensor / Photocell

Photocell or daylight sensors switch the luminaire on as soon natural light falls to a certain level. It can be programmed to switch on during a storm, on a cloudy day (in critical areas) or only at nightfall so as to provide safety and comfort in public spaces.

3

Motion Detection

In places with little nocturnal activity, lighting can be dimmed to a minimum most of the time. By using passive infrared (PIR) or Microwave sensors, the level of light can be raised as soon as a pedestrian or a slow vehicle is detected in the area.

Each luminaire level can be configured individually with several parametres such as minimum and maximum light output, delay period and ON/OFF duration time. Motion sensors can be used in an autonomous or interoperable network.

Mounting Options

Type A Slipfitter

Type B Adjustable Arm Mount

Type C Yoke Mount

Type D Slide & Lock Mount

Type E Square Pole Mount

Type F Round Pole Mount

Type G Trunnion Mount

C- bracket standard material: SPCC.

The bracket may rust if used for an extended period, but it does not affect the lifespan of the light fixture itself. If there are specific requirements (whether it's regarding the material or the shape), please specify them before placing an order.

Other Accessories

Quick connection terminal

Ratings per IEC/EN
Ratings per EN 60664
Nominal voltage (II/2): 400V
Rated surge voltage (II/2): 4 kV
Ambient temperature (operation): +40 °C
Continuous operating temperature: 85 °C
Rated current: 32A
Legend (ratings): (II / 2) Overvoltage category II / Pollution degree 2

Tool-less Waterproof Connector (2-pin/3-pin/4-pin optional)

Unit: mm. Total length of assembly: 108 (REF)

IP rating: IP68
Rated voltage/current: 400V/24A
Test voltage: 2500VAC
Square number of applicable line: 0.5-2.5mm2
Working temperature: -40~+105°C

Thread clamp silicone

Wiring range A=Ø14, cable Ø: 10~14mm A=Ø12, cable Ø: 9~12mm A=Ø8.5, cable Ø: 5~9mm

^{*}As the products are upgraded, the accessories may differ from those described in the pictures. Please consult with our sales team for updated details and order separately.
