

## SL-SERIES SOLAR STREET LIGHT INSTALLATION GUIDE

This procedure is designed as an installation aid. Skilled tradespeople that are familiar with general construction and electrical installation techniques should perform the installation. Licensed electricians should provide electrical installation connections. Installations and connections should be done in accordance with all national and local codes and permits. In no way is this document intended to construe warranty or fitness of use of the products described, nor is it intended to provide safety instruction for those installing the product.

### ⚡ WARNING

Before proceeding with installation or service maintenance of this product:

- Disconnect power to reduce electrical shock risk.
- Review the entire Installation Guide.
- Inspect this properly packaged product for any damage that may have occurred during transit.
- Verify product application complies with manufacturer design recommendations.
- Verify the availability of necessary tools and incidental material.
- Verify applicable code requirements. Field assembly and installation are subject to acceptance by local inspection authority.
- Appropriate safety equipment to be determined by end user, per applicable safety standards and precautions.

### WAY OF INSTALLATION

Step 1:  
Fix the battery box correspondingly to the hole on the solar panel and fix it with mounting screw M8\*45 plus flat pad and spring pad.

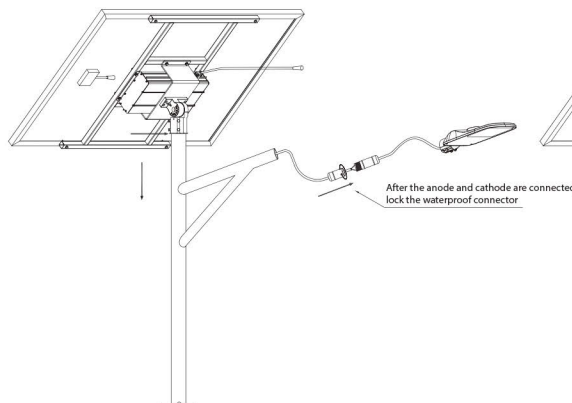

Step 2:  
Fix the bracket type-B correspondingly to the hole on the solar panel support with mounting screw M8\*45 plus flat pad and spring pad.

Step 3:  
Solar panel and battery box kit assembling is finished.

Step 4:  
Hold the assembled solar panel and battery box kit, then pass the wire through the pole, as shown in the upper picture.

Step 5:  
1) Fix the solar panel and battery box kit on the pole, then tighten the screw on the panel bracket.  
2) Connect the positive and negative stages of the fixture, then slide the fixture into the side pole. Tighten the screw on the bracket of the fixture.

Step 6:  
1) Make sure the screw on the bracket of the fixture is tightened.  
2) Connect the socket and plug on the solar panel and lock. The installation is finished.
