

Energy Efficiency TEST REPORT Of SASO-2927	
Report reference No.:	LCS201216094BS
Prepare by.....:	Seth Cai (Project Engineer)
Check by.....:	Ian Luo (Director)
Approved by.....:	Jesse Liu (Manager)
Date of issue.....:	September 03, 2021
Contents.....:	18 pages
Testing laboratory	
Name.....:	Shenzhen Southern LCS Compliance Testing Laboratory Ltd.
Address.....:	101-201, No.39 Buliding, Xialang Industrial Zone, Heshuikou Community, Matian Street, Guangming District, Shenzhen, China
Testing location.....:	As above
Client	
Name.....:	AOK Industrial Company Limited
Address.....:	Building 1, Shengzuozhi Technology Industrial Park, Shajing Street, Shenzhen City, Guangdong, P.R. China
Manufacturer	
Name.....:	AOK Industrial Company Limited
Address.....:	Building 1, Shengzuozhi Technology Industrial Park, Shajing Street, Shenzhen City, Guangdong, P.R. China
Test specification	
Standard.....:	SASO 2927: 2019 Energy efficiency functionality and labelling requirements for lighting products – Part 3: Street lighting
Test procedure.....:	SASO 2927: 2019 Energy efficiency functionality and labelling requirements for lighting products – Part 3: Street lighting LM-84-14 Approved Method for Measuring Luminous Flux and Color Maintenance of LED Lamps, Light Engines, and Luminaires
Non-standard test method...:	N/A

Test item Description	LED STREET LIGHT
Trademark	AOK
Model and/or type reference	AOK-150WiL02-NV-L3-00-40
Rating(s)(V/Hz)	AC120-277V, 50/60Hz, 150W, 1560mA
Test case verdicts	
Test case does not apply to the test object ..	N(N/A)
Test item does meet the requirement	P(Pass)
Test item does not meet the requirement ...	F(Fail)
Testing	
Date of receipt of test item	October 10, 2020
Date(s) of performance of test.....	October 10, 2020 – June 21, 2021
Test item particulars:	
Lamp type:	
- Indirect	<input checked="" type="checkbox"/>
- Direct	<input type="checkbox"/>
Techonology:	
- Lamp	<input type="checkbox"/>
- Luminaires	<input checked="" type="checkbox"/>
- Ballsts and Control Gears	<input type="checkbox"/>
-Use types for luminaires	General (artificial) lighting
Control gear:	
- Integrated	<input type="checkbox"/>
- External	<input checked="" type="checkbox"/>
Use of lamp:	
- Indoor	<input type="checkbox"/>
- Outdoor	<input checked="" type="checkbox"/>
- Industry	<input type="checkbox"/>
Envelope transparency:	
- Clear lamp	<input type="checkbox"/>
- Non-clear lamp	<input checked="" type="checkbox"/>
Dimmable lamp:	<input checked="" type="checkbox"/>
7-Pin NEMA Socket:	<input checked="" type="checkbox"/>
Sensor Ready Socket:	<input type="checkbox"/>
SPD Work temperature of 80°C:	<input checked="" type="checkbox"/>

Meets 3G vibration:	<input checked="" type="checkbox"/>
Meets 1.5G vibration:	<input checked="" type="checkbox"/>
Declared data:	
Rated voltage(V): AC120-277V	
Rated lamp power(W): 150W	
Rated useful luminous flux.....(lm): 21750lm	
Rated Ra: 80	
Rated Beam angle.....(°): 110°	
Rated CCT(K): 4000K	
Rated power factor.....: 0.98	
LED chip Efficacy at 25°C.....lm/w: 168 lm/w	
Rated Energy Efficacy rating.....: Class A	
Rated EEI.....: 0.092	
Over current protection.....: 10KA	
Over voltage protection.....: 10KV	
Electrical protection class.....: I	
Ingress protection.....: IP66	
Impact protection.....: IK08	
Control unit withstand a temperature.....: -10-80°C	
After 2,500 hours: 6 Classification	
Withstand wind speed: 150km/h	
Rated No Load Power of Control Gear.....: 0.5W	
Rated Stand-By Power of Control Gear.....: 0.5W	
Energy Efficiency of Control Gear.....: 91.5%	
IP of Control Gear.....: IP66	
Rated life time(h): 50000h	
Attachments:	
The test report includes: Attachment 1(S) of product photos	
General remarks	
The test results presented in this report relate only to the object tested.	
This report shall not be reproduced, except in full, without the written approval of the Issuing testing laboratory.	
"(see Enclosure #)" refers to additional information appended to the report.	
"(see appended table)" refers to a table appended to the report.	
Throughout this report a comma (point) is used as the decimal separator.	
Remarks	
N/A

Summary of test results

Power(W)(120V test voltage).....	:	150.65
Corrected power Pcor (W) (120V test voltage).....	:	147.64
Useful luminous flux Φ_{use} (lm) (120V test voltage)..	:	21986.50
Reference power Pref (W) (120V test voltage).....	:	1614.03
Power(W)(277V test voltage).....	:	149.25
Corrected power Pcor (W) (277V test voltage).....	:	146.27
Useful luminous flux Φ_{use} (lm) (277V test voltage)..	:	21690.03
Reference power Pref (W) (277est voltage).....	:	1592.27
Lamp survival factor at 6000h (%).....	:	100%
Lamp maintenance at 6000h (%).....	:	91.88%
Number of switching cycles before failure.....	:	15000
Starting time (s).....	:	0.203
Lamp warm-up time to 95 % Φ (s).....	:	N/A
Premature failure rated at 1000h(%).....	:	0
Lamp displacement factor.....	:	0.997
Color rendering index(%).....	:	82.8
Color Temp(K).....	:	3946
Beam angle(°).....	:	109.3
Efficacy (lm/W).....	:	145.94
Energy Efficiency Index (EEI) (120V test voltage)....	:	0.091
Energy efficiency rating (120V test voltage).....	:	<input checked="" type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/> E <input type="checkbox"/> F <input type="checkbox"/> G
Energy Efficiency Index (EEI) (277V test voltage)....	:	0.092

Measurement conditions

1、Lamp Pre-Conditioning

The compact fluorescent lamps were pre-conditioned for 100 hours (mounted in base-up position), before the initial lumen measurement.

No pre-conditioning for LED lamps before the initial lumen measurement.

2、Light Output Measurements

Total light output (luminous flux) was measured using a 2 meters integrating sphere spectral lamp measurement system. Temperature was measured at a position inside the sphere shielded from direct light. Relative humidity of 65% was measured at a position in the testing laboratory.

Spectral radiant flux measurements were done by using spectroradiometer attached to the detector port of the integrating sphere. The sample was operated at 120VAC 60Hz and 277VAC 60Hz in normal operation.

The sample was allowed to stabilise before measurements were made. The integrating sphere spectroradiometer system is calibrated by the reference/standard lamps which are traceable to National Institute of Metrology P.R. CHINA. Lamp efficacy (lumens per watt) for each lamp model was then calculated based on the luminous flux result. Electrical measurements, including voltage, power and power factor, were measured with YOKOGAWA Digital Power Meter, model WT310.

3、Light distribution measurements

Light Distribution was measured using a GO-R5000 Type-C Full-field Speed Goniophotometer. Temperature 25°C and relative humidity of 60% was measured at a position in the testing laboratory. The lamp rotates only around the fixed vertical axle in the prescribed burning position. The lamp and mirror permit the measurement of luminous intensity at the direction of any horizontal or vertical angle without tilting the lamp. The lamp was allowed to stabilize before measurements were made.

4、Equipment List

Instrument	Equipment ID	Model	Calibration Date	Calibration Due Date
Full-field Speed Goniophotometer	SLCS-S-112	GO-R5000	2020/07/02	2021/07/01
Digital Power Meter	SLCS-S-103	PF2010	2020/06/24	2021/06/23
AC Testing Power Source	SLCS-S-115	DPS1060	2020/06/24	2021/06/23
Total Spectral Radiant Flux Standard Lamp	SLCS-S-143	D908S	2020/07/08	2021/07/07
2m Integrating Sphere System	SLCS-S-038	SPR-3000	2020/07/02	2021/07/01
Digital Power Meter	SLCS-S-058	WT310	2020/06/24	2021/06/23
AC Testing Power Source	SLCS-S-111	APW-105N	2020/06/24	2021/06/23
Standard Lamp	SLCS-S-118	S11010017	2020/07/08	2021/07/07
Power Meter	SLCS-S-060	PF9800	2020/06/24	2021/06/23
Flicker Photometer	SLCS-S-119	FP-210	2020/06/24	2021/06/23

SASO-2927:2019			
Clause	Requirement - Test	Result - Remark	Verdict
	The lighting unit shall be designed to operate continuously at external temperature and humidity, taking into account the effects of direct exposure to sunlight and dust storms.		P
	Life span of LED chips and Luminaire shall be greater than or equal to 70% (L70) after 50,000 hours		P
	Color rendering (Ra) ≥ 70		P
	Color temperature must be between 3000 - 6000 K		P
	Vendor shall present ISTMT test results for the luminaire at 50°C which displays the recorded temp within each part of the luminaire (LED chips, Lenses, Driver, SPD)		P
	Colour consistency -5-step MacAdam ellipse or less.		P
	Maintenance factor = Lamp Lumen Depreciation for Led chips x Luminaire Dirt Depreciation (LDD)		P
10.3	Electrical Requirements		P
	The installation shall have overvoltage protection of 10 kV.		P
	All luminaires shall have Class I electrical protection.		P
	The control unit shall be equipped with internal protection to withstand charges and lightning of not less than 4 kV		P
	Constant Voltage Drivers are not allowed to be used; drivers shall be programmable whether DALI (preferable) or 0-10V dimmable		P
	Fixture shall include a base for Receptacle 7-pin NEMA Socket capped (shortcircuited) to enable future use in smart city application		P
	The control units (Driver) must operate with voltage (120-277) Vac at 60 Hz		P
	If the temperature exceeds the permissible limits, the control unit shall reduce the intensity of the lantern lighting gradually until the temperature returns to normal rates; it is not allowed to use control units that turn the lantern fully off when the temperature rises.		P
	For luminaires, the functionality and endurance requirements can be supported by a factory test report.		P
	The Power factor value for driver and integrated luminaire shall be ≥ 0.9		P
	Total Harmonic Distortion of the driver individually $< 15\%$		P
10.4	Mechanical Requirements		P
	The luminaire / integrated luminaire units shall have IP66		P
	The control gear in the lighting fixtures shall have IP66 protection levels		P
	The luminaire shall have an impact protection rating greater than IK08		P
	The control unit enclosure shall be designed to withstand a temperature between -10 and +85.		P
